Enhance Customer Experience

At Transdek, we know the challenges of self-storage. As demand grows, maximising every square metre is vital to increase returns and improve customer experience.

Our mezzanine goods lifts are purpose-built for the self-storage industry, providing a safe, reliable way to move goods between floors. Whether adding a mezzanine or upgrading your site, our goods lifts create a seamless link between levels - helping customers move belongings easily while boosting accessibility and appeal.

Built in the UK to the highest standards, Transdek lifts combine robust engineering with simple operation. They increase capacity, improve safety, and support business growth.

With 25+ years' expertise, we deliver lifts that are durable, intuitive, and quick to install enhancing your facility without disruption. Trusted across the UK self-storage sector, Transdek provides proven solutions that work for you and your customers.

Why Choose Transdek Mezzanine Lifts?

- Customer-friendly design – simple, intuitive controls make it easy for anyone to use
- Tailored to your site – fully customisable platform sizes and lift configurations
- Safety assured – fully compliant with all safety regulations
- Fast installation – modular, surface-mounted install: fitted in just 1.5 days
- Trusted expertise – over 25 years' experience supplying lifts across the self storage and logistics sectors
- Optional extras – enhance performance and user experience with a range of add-ons tailored to your operational needs

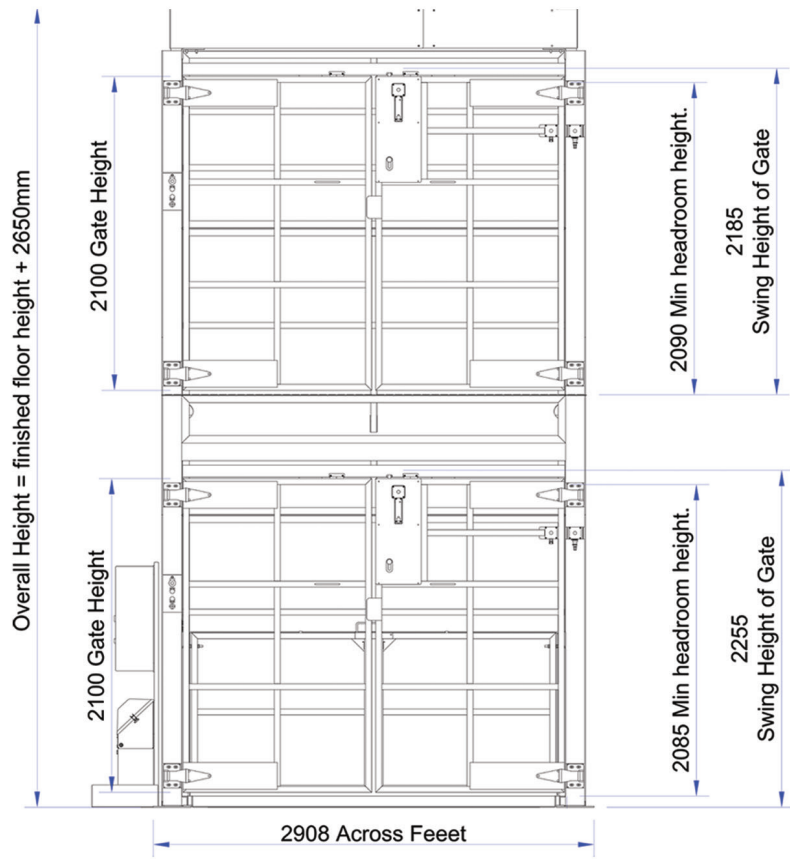

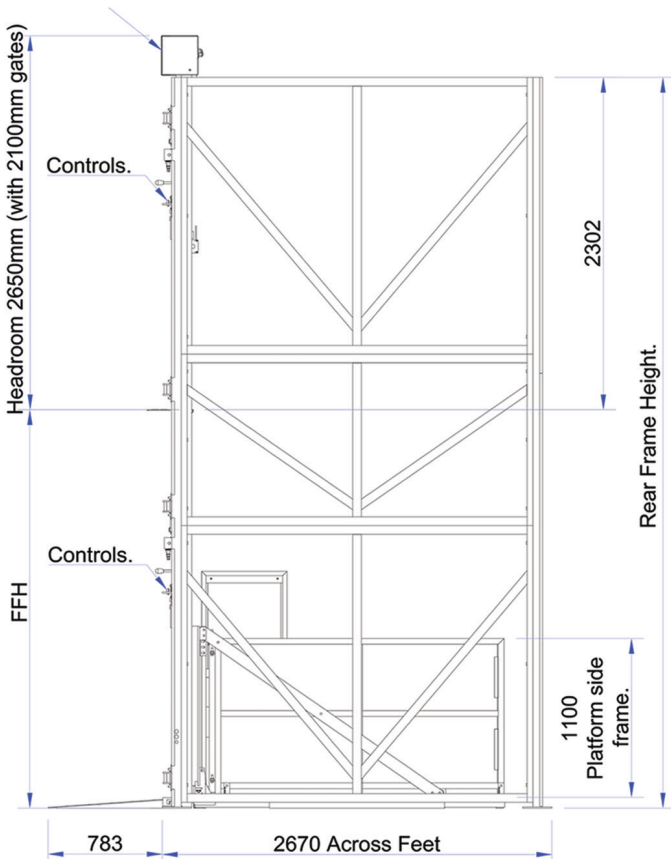

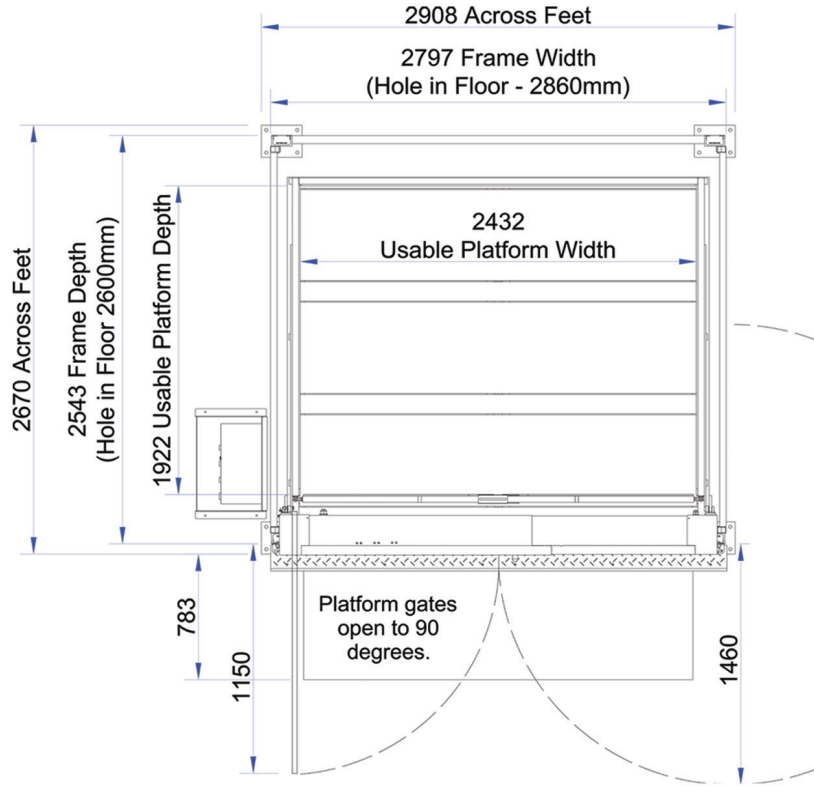

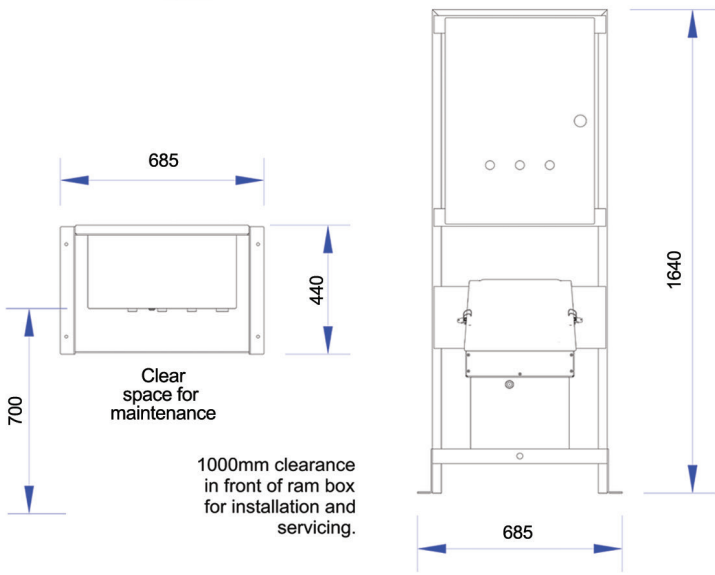

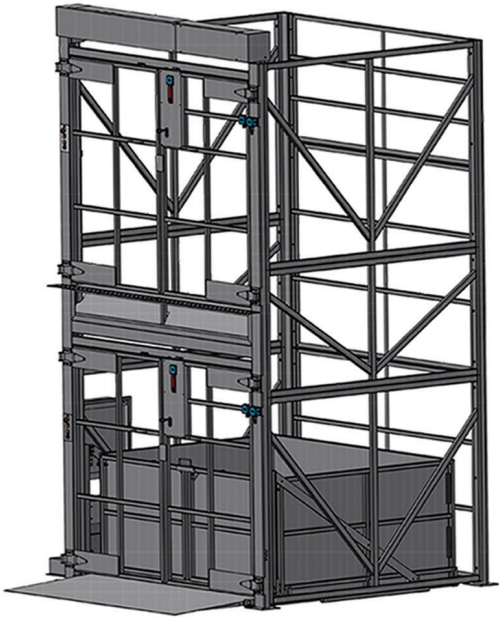

“We have four mezzanine lifts installed by Transdek and are delighted with them. The lifts are easy to operate and very reliable, with a range of inbuilt safety features” Self Store It

“Strategic partnerships are vital at Kuboid, and we value companies that share our commitment to quality. Transdek are knowledgeable, approachable, and provide expert support from sales through to design. We recommend them without hesitation.” Kuboid

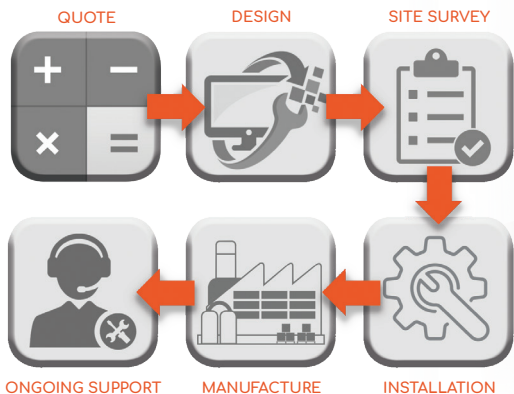

Goods Lift Dimensions

The standard lift, shown in our drawings, offers a platform of approximately 4.67 m² (50 ft²). This size has proven to be the most practical and popular choice for self-storage facilities, with other sizes available on request.

Turnkey Project Management

We provide a full turnkey service for mezzanine lift projects, managing every stage from initial concept to final handover, and working closely with architects, subcontractors, fit-out companies and other partners to ensure a seamless, hassle-free process.
